Why edge compute?

In our digital age more devices are connected to the internet utilising cloud based storage. The number of devices and users continue to increase which puts a strain on bandwidth causing latency.

This can be done in an environment other than a traditional data room thereby saving real estate and comms/data room build expense.

The reduction in user bandwidth availability and the increase in latency could have dire consequences depending upon the application being used.

USystems offer a broad range of self contained intelligent modular systems called *EDGE* to house localised computing, which can be deployed directly into factories, warehouses, offices, M2M, multiple users, businesses etc., either as a standalone cabinet or bayed together in a dedicated room.

This latency and decrease in bandwidth can be overcome by introducing on-premise edge computing. This allows the user to access immediate computer power locally whilst using the cloud simply to store information.

Rapid deployment Micro Data Centre

The EDGE-3 soundproof MDC is an exceptional range of enclosures with a combination of noise reduction and air-cooled thermal performance. The EDGE-3 is a superior alternative to a costly data and communications room, by allowing the deployment of servers and network equipment directly in the office and requires less than 1m² of valuable floor space. It allows for localized on premise computing in populated or more sensitive locations – especially where there might be a concern of server noise being a distraction or breaching ECC working noise guidelines.

The EDGE-3 will reduce equipment noise up to 28.5dBA (99.9%) of IT noise, while providing a thermal load capacity of 11.5kW.

The EDGE-3 is an excellent all round 19" data, comms and server cabinet, with adjustable front and rear mounting angles and 6 cable entry ports. Reducing energy bills is always desirable but expecting a standard server cabinet to assist in this aspect is virtually impossible. That is where the EDGE-3 is uniquely different in design, the two EC fans located in the rear doors maintain sufficient airflow throughout the enclosure, providing the required level of thermal dissipation, while optimizing the level of 'ambient' background noise the cabinet itself generates

and minimizing power expenditure. To ensure maximum energy efficiency, it is controlled with variable fan speed controls and temperature sensors.

Peace of mind is provided by an onboard environmental and optional security monitoring system. Real time alarms and alerts, which can be viewed via the WebUI, will notify authorized personnel via email alarms relating to any issues with the cabinet. Meaning you know what's going on and can monitor who's coming and going 24/7. Advanced configurations are available for enhanced levels of security and redundancy.

The LCD touch display on the cabinet doors will change colour if the cabinet status changes, alerts (amber) or alarm (red). It will remain blue when working correctly. Touching the display will show environmental data from each temperature/humidity sensors or in the event of an alarm what that alarm specifically is.

Simple 'plug and play' EDGE-3 solution is supplied pre-configured from the factory with built in intelligence and an energy efficient air-cooling system for effortless installation and customer convenience.

7 Reasons to Buy

1. Cost-Effective & Green - server rooms are costly to build and run whereas EDGE-3 offer a fraction of the running costs and minimal initial investment
2. Cool - innovative air-flow design for effective thermal dissipation of 11.5kW
3. Soundproof - reduce equipment noise up to 28.5dBA (99.9%) of IT noise
4. Lockable - security features keep your equipment safe
5. Easy to Deploy - just plug and go
6. Expandable – when you need extra capacity, just add another EDGE-3
7. Portable - easily relocated to another room or building

Typical application spaces:

- Staffed offices
- IT/comms rooms
- Studios
- Libraries
- Laboratories
- Receptions
- Surgeries
- Hospital wards
- Showrooms
- Classrooms
- Home offices

For safe running we recommend siting in a ventilated space, typically at 70°F/21°C and below but not warmer than 80.5°F/27°C

A sound investment!

Deploying active IT equipment into the middle of a working environment can be off-putting for visitors and detrimental to working conditions in terms of the constant evasive noise and excessive heat generated from the active equipment.

The *EDGE-3* effortlessly removes these issues and stylishly blends into the working environment. The 42U cabinet effectively removes up to 28.5dBA (99.9%) of IT noise, which is tech speak for saying that it will reduce server noise down to a whisper.

Features and benefits

EC fan technology

Energy saving and hot swappable

Swing handle and two point locking

Providing high security—electronic upgrade available

LCD display

Displaying alarm state and major monitoring points

Foam cable entry system

Speedy installation without compromise to performance

**Dynamic load
750kg**

****Static load
1500kg**

Heavy duty castors, Plinth corners, levelling feet (standard)
For safe rapid deployment

IP54 Upgrade option

IP44 as standard for protection from dust ingress

Door dust filters (optional upgrade)

Providing a dust free operational environment

Features and benefits cont.

EDGE Management System EMS
Providing real time environmental monitoring

Anti air-recirculation kit
Save energy and maintain hardware performance

Cable management fingers (optional upgrade)
Ideal for tidy cabling and patching

Plinth panels (optional upgrade)
For that finishing touch

Cable tray (optional upgrade)
Ensure best cabling practice

ETL listed
Proof of product compliance to published industry standards

Security Camera (optional upgrade)
Captures video and images automatically when the door opens

Cable entry
Generous access with three entries at the top and three at the bottom of the cabinet

Technical Specification

General		Edge 3 12U	Edge 3 24U	Edge 3 42U

Air cooling capacity 115V	kW	6	9	10

*Dynamic Load Rating is the total rolling mass of the rack and includes the rack frame, cladding and any fitted equipment and accessories and is subject to the load being evenly distributed at 20U height and below. Dynamic load relates to the movement of a rack within the same data centre on a smooth floor clear of any obstacles. Not suitable for transportation on a vehicle when loaded to this weight.

**This figure will be affected if the filter is not fitted/regularly maintained

Dynamic load relates to the movement of a rack within the same data centre on a smooth floor clear of any obstacles. Not suitable for transportation on a vehicle when loaded to this weight.*

Compliance statement: Manufactured to IEC 602973 and EIA STD 310 for panels and racks housing electronic equipment

EDGE Management System 'EMS'

Providing complete peace of mind

A standard feature of the EDGE-3 is the inclusion of the Edge Management System EMS controlling the 2x EC Fans and the environmental status of the cabinet with up to 4 temperature and humidity reporting and alarming if over threshold is reached.

Additional contact sensors to notify of door access. Displayed on a easy to view Webui with SNMP trap send, V1, 2 and 3 available to send out data and alarms.

Because you need to know

Whilst it is the EMS which takes care of the energy efficient cooling, it is also the EMS which brings together the whole solution.

Alarms and alerts in real time will notify you of any issues with your cabinet. The LCD screen on the cabinet will also show an alarm status, touch will provide sensor data, fan status and contact sensor triggers.

300w Cable Tray (Factory Fitted)	Black	E3B-1230-CT-AF	E3B-2430-CT-AF	E3B-4230-CT-AF
300w Cable Tray (Packaged Accessory)	Black	E3B-1230-CT-AA	E3B-2430-CT-AA	E3B-4230-CT-AA
Cable Management Fingers (Pair) (Factory Fitted) *	Black	E3B-12-CM-AF	E3B-24-CM-AF	E3B-42-CM-AF
Cable Management Fingers (Pair) (Packaged Accessory) *	Black	E3B-12-CM-AA	E3B-24-CM-AA	E3B-42-CM-AA
Passive Filter Replacement Kit (Pair) (Packaged Accessory)		E3X-12-PF-AA	E3X-24-PF-AA	E3X-42-PF-AA
Active Filter Replacement Kit (Pair) (Packaged Accessory)		E3X-AF-AA		
Camera Security Kit (Factory Fitted)		EXX-CS-AF		
Camera Security Kit (Packaged Accessory)		EXX-CS-AA		
Temperature and Humidity Sensor (Packaged Accessory)		EXX-TH-AA		
Contact Sensor (Packaged Accessory)		EXX-CO-AA		
Foam Cable Entry Block (Packaged Accessory)		EXX-CE-AA		

*Note—Cisco Side Venting Kit and Cable Management Kit will not both fit, please only select one per EDGE-3
Factory Fitted items must be ordered with EDGE-3 cabinet

EDGE Accessories

EDGE Air ducting kit option

Best practice energy saving option

The *EDGE* air ducting kit offers massive cost savings by reducing the need for ambient air conditioning and heating. It enables hot exhaust air to be directed outside the room or building, **saves on energy** and keeps the room cool and protects the ambient temperature.

- Save money, energy and power consumption on existing room air conditioning
- Divert and recycle waste hot air providing free heating to other rooms
- Helps prevent hardware and software failures
- Helps prevent any unnecessary downtime
- Access to rear of cabinet and door opening is not affected when the ducting kit is utilised
- Retrofittable to the 24U and 42U edge-3 cabinet
- Can be directed to exhaust through wall, window or ceiling plenum

Cisco side venting kit

Side venting kit for active IT equipment which cools from side to side such as Cisco switch gear etc.

Side venting equipment—Cisco server

Modular side venting kit fitted to frame for illustration

Extra depth server extension kit

To accommodate greater depth IT equipment such as some of the latest high power servers

The extension kit enables these to be housed in the *EDGE-3* by giving an additional 300mm depth to accommodate this type of specialist, deeper equipment.

The extension kit is fully retrofittable and will not adversely affect the performance of the cabinet.

Intelligent power

A full suite of fully specified intelligent power strips in a variety of entry levels

Security

A full electronic access and security system, key pad, bio metric etc.

Uninterruptible power supplies

Protection for hardware from unexpected power disruption
